Authorization		IAM-09.2	managed (physical and virtual) applications, infrastructure systems, and network components shall be authorized by the organization's management prior to access being granted and appropriately restricted as per established policies and procedures. Upon request, provider shall inform customer (tenant) of this user access, especially if	Do you provide upon the request of users with legitimate interest access (e.g., employees, contractors, customers (tenants), business partners and/or suppliers) to data and any owned or managed (physical and virtual) applications, infrastructure systems and network components?		x		assigned Upon request and through VPNs or similar secured connections it's possible to provide connection to relevant data but not
Identity & Access Management	IAM-10	IAM-10.1	User access shall be authorized and revalidated for entitlement appropriateness, at planned intervals, by the	Do you require a periodical authorization and validation (e.g. at least annually) of the entitlements for all system users and administrators (exclusive of users maintained by your tenants), based on the rule of least		x		infrastructure components
User Access Reviews		IAM-10.2	organization's business leadership or other accountable business role or function supported by evidence to demonstrate the organization is adhering to the rule of	privilege, by business leadership or other accountable business role or function? Do you collect evidence to demonstrate that the policy (see question IAM-10.1) has been enforced?			v	
		IAM-10.3	least privilege based on job function. For identified access violations, remediation must follow established user access	Do you ensure that remediation actions for access violations follow user access policies?	x			
		IAM-10.4	policies and procedures.	Will you share user entitlement and remediation reports with your tenants, if inappropriate access may have been allowed to tenant data?	×			
Identity & Access	IAM-11	IAM-11.1	Timely de-provisioning (revocation or modification) of user access to data and organizationally-owned or managed	Is timely deprovisioning, revocation, or modification of user access to the organizations systems,				
User Access Revocation		IAM-11.2	(physical and virtual) applications, infrastructure systems, and network components, shall be implemented as per established policies and procedures and based on user's	information assets, and data implemented upon any change in status of employees, contractors, customers, business partners, or involved third parties?	×			
		10101-11.2	change in status (e.g., termination of employment or other business relationship, job change, or transfer). Upon	Is any change in user access status intended to include termination of employment, contract or agreement, change of employment or transfer within the organization?	×			User account and access are removed / reset after the employment is ended
dentity & Access Management User ID		IAM-12.1	Internal corporate or customer (tenant) user account credentials shall be restricted as per the following, ensuring appropriate identity, entitlement, and access management	Do you support use of, or integration with, existing customer-based Single Sign On (SSO) solutions to your service?		x		
Tredentials		IAM-12.2	and in accordance with established policies and procedures: • Identity trust verification and service-to-service application (API) and information processing	Do you use open standards to delegate authentication capabilities to your tenants?		x		
		IAM-12.3	interoperability (e.g., SSO and Federation) • Account credential lifecycle management from	Do you support identity federation standards (e.g., SAML, SPML, WS-Federation, etc.) as a means of authenticating/authorizing users?		x		
		IAM-12.4	instantiation through revocation • Account credential and/or identity store minimization or re-use when feasible	Do you have a Policy Enforcement Point capability (e.g., XACML) to enforce regional legal and policy constraints on user access?			x	
		IAM-12.5	 Adherence to industry acceptable and/or regulatory compliant authentication, authorization, and accounting (AAA) rules (e.g., strong/multi-factor, expireable, non- 	Do you have an identity management system (enabling classification of data for a tenant) in place to enable both role-based and context-based entitlement to data?	×			
		IAM-12.6	shared authentication secrets)	Do you provide tenants with strong (multifactor) authentication options (e.g., digital certs, tokens, biometrics, etc.) for user access?			×	
		IAM-12.7		Do you allow tenants to use third-party identity assurance services?		x		
		IAM-12.8		Do you support password (e.g., minimum length, age, history, complexity) and account lockout (e.g., lockout threshold, lockout duration) policy enforcement?	×			
		IAM-12.9		Do you allow tenants/customers to define password and account lockout policies for their accounts?	x			
		IAM-12.10		Do you support the ability to force password changes upon first logon?	×			
		IAM-12.11		Do you have mechanisms in place for unlocking accounts that have been locked out (e.g., self-service via				
				email, defined challenge questions, manual unlock)?	×			User are manually unlocked by tenant user with administrator role
dentity & Access Management Utility Programs		IAM-13.1	Utility programs capable of potentially overriding system, object, network, virtual machine, and application controls shall be restricted.	Are access to utility programs used to manage virtualized partitions (e.g. shutdown, clone, etc) appropriately restricted and monitored?	x			Only authorized personnel has accounts to manage an use utility programs related
Access nfrastructure & Virtualization Security	IVS-01	IVS-01.1	Higher levels of assurance are required for protection, retention, and lifecycle management of audit logs, adhering to applicable legal, statutory, or regulatory compliance	Are file integrity (host) and network intrusion detection (IDS) tools implemented to help facilitate timely detection, investigation by root cause analysis, and response to incidents?	x			Compliance is guaranteed b Insiel SpA (qualified CSP supplier)
Audit Logging / Intrusion Detection		IV5-01.2	obligations and providing unique user access accountability to detect potentially suspicious network behaviors and/or file integrity anomalies, and to support forensic					Compliance is guaranteed b
		IVS-01.3	investigative capabilities in the event of a security breach.	Is physical and logical user access to audit logs restricted to authorized personnel?	×			Insiel SpA (qualified CSP supplier)
		IV5-01.4		controls/architecture/processes has been performed? Are audit logs centrally stored and retained?		x		
		IVS-01.5		Are audit logs reviewed on a regular basis for security events (e.g., with automated tools)?		x		
nfrastructure & /irtualization	IV5-02	IVS-02.1	The provider shall ensure the integrity of all virtual machine images at all times. Any changes made to virtual machine	Do you log and alert any changes made to virtual machine images regardless of their running state (e.g., dormant, off or running)?	×			
Security Change Detection		IVS-02.2	images must be logged and an alert raised regardless of their running state (e.g., dormant, off, or running). The results of a change or move of an image and the subsequent validation of the image's integrity must be immediately available to customers through electronic methods (e.g., portals or alerts).	usimiant, on or running;? Does the virtual machine management infrastructure include a tamper audit or software integrity function to detect changes to the build/configuration of the virtual machine?	x			VMWare integrated compatibility and checks ar used to ensure changes and configurations made on Virtual Machines are working as intened
		IV5-02.3		Are changes made to virtual machines, or moving of an image and subsequent validation of the image's integrity, made immediately available to customers through electronic methods (e.g., portals or alerts)?	×			
nfrastructure & /irtualization	IVS-03	IVS-03.1	A reliable and mutually agreed upon external time source shall be used to synchronize the system clocks of all	Do you use a synchronized time-service protocol (e.g., NTP) to ensure all systems have a common time reference?	×			On all cloud systems the NI protocol is configured to sync on the CET time-zone
Security Infrastructure & Virtualization	IVS-04	IV5-04.1	relevant information processing systems to facilitate tracing. The availability, quality, and adequate capacity and resources shall be planned, prepared, and measured to deliver the required system performance in accordance with	Do you provide documentation regarding what levels of system (e.g., network, storage, memory, I/O, etc.) oversubscription you maintain and under what circumstances/scenarios?	×			Compliance is guaranteed b Insiel SpA (qualified CSP
Security Capacity / Resource		IVS-04.2	legal, statutory, and regulatory compliance obligations. Projections of future capacity requirements shall be made	Do you restrict use of the memory oversubscription capabilities present in the hypervisor?	×			supplier) Compliance is guaranteed b Insiel SpA (qualified CSP
Planning		IVS-04.3	to mitigate the risk of system overload.	Does your system's capacity requirements take into account current, projected, and anticipated capacity				supplier) Each Datacenter is capable holding a fixed amount of
				over your systems councilly requirements take into account current, projected, and anticipated capacity needs for all systems used to provide services to the tenants?	×			Virtual Machines which is always respected in order to ensure proper performance
Infrastructure &	IVS-05	IVS-04.4 IVS-05.1	Implementers shall ensure that the security vulnerability	Is system performance monitored and tuned in order to continuously meet regulatory, contractual, and business requirements for all the systems used to provide services to the tenants?		x		
Infrastructure & Virtualization Security			assessment tools or services accommodate the virtualization technologies used (e.g., virtualization aware).	Do security vulnerability assessment tools or services accommodate the virtualization technologies being used (e.g., virtualization aware)?		x		
nfrastructure & /irtualization Security	IVS-06	IVS-06.1	Network environments and virtual instances shall be designed and configured to restrict and monitor traffic	For your laaS offering, do you provide customers with guidance on how to create a layered security architecture equivalence using your virtualized solution?			x	
Security Network Security		IVS-06.2	between trusted and untrusted connections. These configurations shall be reviewed at least annually, and supported by a documented justification for use for all	Do you regularly update network architecture diagrams that include data flows between security domains/zones?			x	
		IVS-06.3	allowed services, protocols, ports, and compensating controls.	Do you regularly review for appropriateness the allowed access/connectivity (e.g., firewall rules) between security domains/zones within the network?	×			Compliance is guaranteed b Insiel SpA (qualified CSP
		IVS-06.4		Are all firewall access control lists documented with business justification?	x			supplier) Compliance is guaranteed b Insiel SpA (qualified CSP
nfrastructure & /irtualization Security DS Hardening and	IVS-07	IVS-07.1	Each operating system shall be hardened to provide only necessary ports, protocols, and services to meet business needs and have in place supporting technical controls such as: antivirus, file integrity monitoring, and logging as part of	Are operating systems hardened to provide only the necessary ports, protocols, and services to meet business needs using technical controls (e.g., antivirus, file integrity monitoring, and logging) as part of their baseline build standard or template?	×			
Base Controls	IVS-08	IV5-08.1	their baseline operating build standard or template. Production and non-production environments shall be	·				Production and test
Virtualization Security Production / Non- Production			separated to prevent unauthorized access or changes to information assets. Separation of the environments may include: stateful inspection firewalls, domain/realm authentication sources, and clear segregation of duties for	For your SaaS or PaaS offering, do you provide tenants with separate environments for production and test processes?	×			environments are separated on various levels. Compliance is also guaranteed by Insiel SpA (qualified CSP supplier)
Environments		IV5-08.2	personnel accessing these environments as part of their job duties.	For your laaS offering, do you provide tenants with guidance on how to create suitable production and test environments?			x	(qualified CSP supplier)
		IVS-08.3						

Infrastructure & Virtualization Security Segmentation	IVS-09	IVS-09.1	Multi-tenant organizationally-owned or managed (physical and virtual) applications, and infrastructure system and network components, shall be designed, developed, deployed, and configured such that provider and customer (tenant) user access is appropriately segmented from other	Are system and network environments protected by a firewall or virtual firewall to ensure business and customer security requirements?	x			A perimeter firewall is in place backed up by individual firewalls and networks configurations to isolate each tenant
		IVS-09.2	tenant users, based on the following considerations: • Established policies and procedures • Isolation of business critical assets and/or sensitive user data and sessions that mandate stronger internal controls	Are system and network environments protected by a firewall or virtual firewall to ensure compliance with legal, regulatory and contractual requirements?	x			Compliance is also guaranteed by Insiel SpA (qualified CSP supplier) for the IaaS service
		IVS-09.3	and high levels of assurance • Compliance with legal, statutory, and regulatory compliance obligations	Have you implemented the necessary measures for the appropriate isolation and segmentation of tenants' access to infrastructure system and network components, in adherence to established policies, legal, statutory, and regulatory compliance obligations?	x			Compliance is guaranteed by Insiel SpA (qualified CSP supplier) for the IaaS service.
		IVS-09.4		Do you have the ability to logically segment or encrypt customer data such that data may be produced for a single tenant only, without inadvertently accessing another tenant's data?	x			Compliance is also guaranteed by Insiel SpA (qualified CSP supplier) for the IaaS service.
		IVS-09.5		Are system and network environments protected by a firewall or virtual firewall to ensure protection and isolation of sensitive data?	x			Each environment is protected by a main firewall backed up by dedicated firewall and network configuration to ensure security and the best performance for the service
Infrastructure & Virtualization Security VM Security - Data Protection	IVS-10	IV5-10.1	Secured and encrypted communication channels shall be used when migrating physical servers, applications, or data to virtualized servers and, where possible, shall use a network segregated from production-level networks for such migrations.	Are secured and encrypted communication channels used when migrating physical servers, applications, or data to virtual servers?	×			Secure ways are always adopted to migrate data from and to virtual servers. Compliance is also guaranteed by Insiel SpA (qualified CSP supplier) for the laaS service.
		IV5-10.2		Do you use a network segregated from production-level networks when migrating physical servers, applications, or data to virtual servers?	×			A dedicated network is used to migrate the virtual machines. Compliance is also guaranteed by Insiel SpA (qualified CSP supplier) for the laaS service.
Infrastructure & Virtualization Security VMM Security - Hypervisor Hardening	IVS-11	IV5-11.1	Access to all hypervisor management functions or administrative consoles for systems hosting virtualized systems shall be restricted to personnel based upon the principle of least privilege and supported through technical controls (e.g., two-factor authentication, audit trails, IP address filtering, firewalls, and TLS encapsulated communications to the administrative consoles).	Do you restrict personnel access to all hypervisor management functions or administrative consoles for systems hosting virtualized systems based on the principle of least privilege and supported through technical controls (e.g., two-factor authentication, audit trails, IP address filtering, firewalls and TLS- encapsulated communications to the administrative consoles)?	x			Only authorized personnel is permitted to access to the hypervisor functions with dedicated accounts
Infrastructure & Virtualization	IVS-12	IVS-12.1 IVS-12.2	business processes and technical measures implemented, to	Are policies and procedures established and mechanisms configured and implemented to protect the wireless network environment perimeter and to restrict unauthorized wireless traffic?			x	The laaS service does not use wireless networks Default setting are replaced
Security Wireless Security			protect wireless network environments, including the following: • Perimeter firewalls implemented and configured to restrict unauthorized traffic • Security settings enabled with strong encryption for authentication and transmission, replacing vendor default settings (e.g., encryption keys, passwords, and SIMMP community strings)	Are policies and procedures established and mechanisms implemented to ensure wireless security settings are enabled with strong encryption for authentication and transmission, replacing vendor default settings (e.g., encryption keys, passwords, SNMP community strings)?	x			with internal secure setting and configuration. Compliance is also guaranteed by Insiel SpA (qualified CSP supplier) for the laaS service. Not applicable for the laaS service.
		IVS-12.3	User access to wireless network devices restricted to authorized personnel The capability to detect the presence of unauthorized	Are policies and procedures established and mechanisms implemented to protect wireless network environments and detect the presence of unauthorized (rogue) network devices for a timely disconnect			×	The laaS service does not use
Infrastructure &	IVS-13	IVS-13.1	Network architecture diagrams shall clearly identify high-	from the network? Do your network architecture diagrams clearly identify high-risk environments and data flows that may have				wireless networks
Virtualization Security Network Architecture		IV5-13.2	risk environments and data flows that may have legal compliance impacts. Technical measures shall be implemented and shall apply defense-in-depth techniques (e.g., deep pack-tanahysis, straff: throtting, and black- holing) for detection and timely response to network-based attacks associated with anomalous ingress or gress traffic patterns (e.g., McG sporking and Arb Proisoning attacks) and/or distributed denial-of-service (DDoS) attacks.	legal compliance impacts? Do you implement technical measures and apply defense-in-depth techniques (e.g., deep packet analysis, traffic thirotiling and black-holing) for detection and timely response to network-based attacks associated with anomalous ingress or egress traffic patterns (e.g., MAC spoofing and ARP poisoning attacks) and/or distributed denial-of-service (DDoS) attacks?	x			Upon detection of anomalous traffic the relative source is, in a first moment, temporarily blacklisted, and in the case of multiple occurrences from the same source, it's
Interoperability & Portability APIs	IPY-01	IPY-01.1	The provider shall use open and published APIs to ensure support for interoperability between components and to facilitate migrating applications.	Do you publish a list of all APIs available in the service and indicate which are standard and which are customized?	x			permanently blacklisted
Interoperability & Portability Data Request	IPY-02	IPY-02.1	All structured and unstructured data shall be available to the customer and provided to them upon request in an industry-standard format (e.g., doc, xls, odf, logs, and flat	Is unstructured customer data available on request in an industry-standard format (e.g., .doc, .xls, or .pdf)?	x			Unimarc standard format and excel format for circulation data
Interoperability & Portability Policy & Legal	IPY-03	IPY-03.1	Policies, procedures, and mutually-agreed upon provisions and/or terms shall be established to satisfy customer (tenant) requirements for service-to-service application (API) and information processing interoperability, and	Do you provide policies and procedures (i.e. service level agreements) governing the use of APIs for interoperability between your service and third-party applications?		x		
		IPY-03.2	portability for application development and information exchange, usage, and integrity persistence.	If using virtual infrastructure, do you allow virtual machine images to be downloaded and ported to a new cloud provider?	×			Virtual Machines images are created with standard OVF and OVA formats which are the most common format and generally accepted by various cloud providers. Upon request, with limited capabilities, is possible to create different formats. Tenants are not autonomous in this operation and internal actions are required
lateroone kiliter 9		IPY-03.3	The new idea shall use service (a.e. were described	Do you provide policies and procedures (i.e. service level agreements) governing the migration of application data to and from your service?	×			When performed, data
Interoperability & Portability Standardized Network Protocols	IPY-04	IPY-04.1 IPY-04.2	The provider shall use secure (e.g., non-clear text and authenticated) standardized network protocols for the import and export of data and to manage the service, and shall make available a document to consumers (tenants) detailing the relevant interoperability and portability	Is data import, data export, and service management be conducted over secure (e.g., non-clear text and authenticated), industry accepted standardized network protocols?	x			when performed, data export is made with secure connections and VPNs where possible
	IPY-05	IPY-04.2	detailing the relevant interoperability and portability standards that are involved. The provider shall use an industry-recognized virtualization	Do you provide consumers (tenants) with documentation detailing the relevant interoperability and portability network protocol standards that are involved?	x			Informations related to the connections and VPNs used is available upon request OVF and OVA formats are
Interoperability & Portability Virtualization	141-05		platform and standard virtualization formats (e.g., OVF) to help ensure interoperability, and shall have documented custom changes made to any hypervisor in use, and all solution-specific virtualization hooks, available for customer	Do you use an industry-recognized virtualization platform and standard virtualization formats (e.g., OVF) to help ensure interoperability?	×			primarly used. Upon request and with limited capabilities is possibile to provide other formats
		IPY-05.2	review.	If using virtual infrastructure, are machine images made available to the customer in a way that would allow the customer to replicate those images in their own off-site storage location?		x		Currently there are no
				Do you have documented custom changes made to any hypervisor in use, and all solution-specific virtualization hooks available for customer review?		x		custom changes made to the hypervisor used
Mobile Security Anti-Malware	MOS-01	MOS-01.1	Anti-malware awareness training, specific to mobile devices, shall be included in the provider's information security awareness training.	Do you provide anti-malware training specific to mobile devices as part of your information security awareness training?	x			
Mobile Security Application Stores	MOS-02	MOS-02.1	A documented list of approved application stores has been communicated as acceptable for mobile devices accessing or storing provider managed data.	Do you document and make available lists of approved application stores for mobile devices accessing or storing company data and/or company systems?			x	Company does not support internal use of mobile devices (BYOD) for development or administration of its services.
Mobile Security Approved Applications	MOS-03	MOS-03.1	The company shall have a documented policy prohibiting the installation of non-approved applications or approved applications not obtained through a pre-identified application store.	Do you have a policy enforcement capability (e.g., XACML) to ensure that only approved applications and those from approved application stores can be loaded onto a mobile device?			x	Company does not support internal use of mobile devices (BYOD) for development or administration of its services
Mobile Security Approved	MOS-04	MOS-04.1	The BYOD policy and supporting awareness training clearly states the approved applications, application stores, and application extensions and plugins that may be used for	Does your BYOD policy and training clearly state which applications and applications stores are approved for use on BYOD devices?			x	Company does not support internal use of mobile devices (BYOD) for
Software for Mobile Security	MOS-05	MOS-05.1	The provider shall have a documented mobile device policy					

Mobile Security Cloud Based Services	MOS-06	M05-06.1	All cloud-based services used by the company's mobile devices or BYOD shall be pre-approved for usage and the storage of company business data.	Do you have a documented list of pre-approved cloud based services that are allowed to be used for use and storage of company business data via a mobile device?			x	
Mobile Security Compatibility	MOS-07	MOS-07.1	The company shall have a documented application validation process to test for mobile device, operating system. and application compatibility issues.	Do you have a documented application validation process for testing device, operating system, and application compatibility issues?	x			In the context of application deployed to mobile environments.
Mobile Security Device Eligibility	MOS-08	MOS-08.1	system, and application compatibility issues. The BYOD policy shall define the device and eligibility requirements to allow for BYOD usage.	Do you have a BYOD policy that defines the device(s) and eligibility requirements allowed for BYOD usage?			x	Company does not support internal use of mobile devices (BYOD) for
Mobile Security Device Inventory	MOS-09	MOS-09.1	An inventory of all mobile devices used to store and access company data shall be kept and maintained. All changes to the status of these devices, (i.e., operating system and	Do you maintain an inventory of all mobile devices storing and accessing company data which includes device status (e.g., operating system and patch levels, lost or decommissioned, device assignee)?			x	development or administration of its services.
Mobile Security Device	MOS-10	MOS-10.1	A centralized, mobile device management solution shall be deployed to all mobile devices permitted to store, transmit, or process customer data.	Do you have a centralized mobile device management solution deployed to all mobile devices that are permitted to store, transmit, or process company data?		-	x	-
Management Mobile Security Encryption	MOS-11	MOS-11.1	The mobile device policy shall require the use of encryption either for the entire device or for data identified as sensitive	Does your mobile device policy require the use of encryption for either the entire device or for data identified as sensitive enforceable through technologe: controls for all mobile devices?		-	x	-
Mobile Security lailbreaking and	MOS-12	MOS-12.1	on all mobile devices and shall be enforced through technology controls. The mobile device policy shall prohibit the circumvention of built-in security controls on mobile devices (e.g.,	Does your mobile device policy prohibit the circumvention of built-in security controls on mobile devices			x	-
Rooting		MOS-12.2	jailbreaking or rooting) and is enforced through detective and preventative controls on the device or through a centralized device management system (e.g., mobile device	(e.g., jailbreaking or rooting)? Do you have detective and preventative controls on the device or via a centralized device management system which prohibit the circumvention of built-in security controls?			x	-
Mobile Security egal	MOS-13	MOS-13.1	management) The BYOD policy includes clarifying language for the expectation of privacy, requirements for litigation, e-	Does your BYOD policy clearly define the expectation of privacy, requirements for litigation, e-discovery, and legal holds?			x	-
		MOS-13.2	discovery, and legal holds. The BYOD policy shall clearly state the expectations over the loss of non-company data in	Does the BYOD policy clearly state the expectations over the loss of non-company data in case a wipe of the device is required?			×	-
Mobile Security Lockout Screen	MOS-14	M05-14.1	the case that a wipe of the device is required. BYOD and/or company owned devices are configured to require an automatic lockout screen, and the requirement	Do you require and enforce via technical controls an automatic lockout screen for BYOD and company owned devices?			×	-
Mobile Security Operating Systems	MOS-15	MOS-15.1	shall be enforced through technical controls Changes to mobile device operating systems, patch levels, and/or applications shall be managed through the company's change management processes.	owneu overces? Do you manage all changes to mobile device operating systems, patch levels, and applications via your company's change management processes?		-	x	-
Mobile Security Passwords	MOS-16	MOS-16.1	Password policies, applicable to mobile devices, shall be documented and enforced through technical controls on all	Do you have password policies for enterprise issued mobile devices and/or BYOD mobile devices?			x	-
		MOS-16.2	company devices or devices approved for BYOD usage, and shall prohibit the changing of password/PIN lengths and	Are your password policies enforced through technical controls (i.e. MDM)?			×	-
		MOS-16.3	authentication requirements.	Do your password policies prohibit the changing of authentication requirements (i.e. password/PIN length)			x	-
Mobile Security	MOS-17	MOS-17.1	The mobile device policy shall require the BYOD user to perform backups of data, prohibit the usage of unapproved	via a mobile device? Do you have a policy that requires BYOD users to perform backups of specified corporate data?			x	-
oncy		MOS-17.2	application stores, and require the use of anti-malware software (where supported).	Do you have a policy that requires BYOD users to prohibit the usage of unapproved application stores?			x	-
		MOS-17.3		Do you have a policy that requires BYOD users to use anti-maiware software (where supported)?			x	-
Mobile Security	MOS-18	MOS-18.1	All mobile devices permitted for use through the company	Do you have a poincy that requires BTOD users to use anti-maiware software (where supported)? Does your IT provide remote wipe or corporate data wipe for all company-accepted BYOD devices?			x	-
Remote Wipe		MOS-18.2	BYOD program or a company-assigned mobile device shall allow for remote wipe by the company's corporate IT or	Does your II provide remote wipe or corporate data wipe for all company-accepted BYOD devices?			x	-
Mobile Security	MOS-19	MOS-19.1	shall have all company-provided data wiped by the Mobile devices connecting to corporate networks or storing	Do your mobile devices have the latest available security-related patches installed upon general release by			x	-
Security Patches		MO5-19.2	and accessing company information shall allow for remote software version/patch validation. All mobile devices shall have the latest available security-related patches installed	the device manufacturer or carrier? Do your mobile devices allow for remote validation to download the latest security patches by company IT				-
Mobile Security	MOS-20	M05-20.1	upon general release by the device manufacturer or carrier and authorized IT personnel shall be able to perform these The BYOD policy shall clarify the systems and servers	personnel?			x	-
Users	M03-20	MOS-20.2	allowed for use or access on a BYOD-enabled device.	Does your BYOD policy darify the systems and servers allowed for use or access on the BYOD-enabled device?			x	-
				Does your BYOD policy specify the user roles that are allowed access via a BYOD-enabled device?			x	
Security Incident Management, E- Discovery, & Cloud Forensics Contact / Authority Maintenance	SEF-01		Points of contact for applicable regulation authorities, national and local law enforcement, and other legal jurisdictional authorities shall be maintained and regularly quotated (e.g., change in impacted-scope and/or a change in any compliance obligation) to ensure direct compliance liaisons have been established and to be prepared for a forensic investigation requiring rapid engagement with law	Do you maintain liaisons and points of contact with local authorities in accordance with contracts and appropriate regulations?	x			
Security Incident Management, E- Discovery, &	SEF-02	SEF-02.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to triage security-related events and ensure timely and	Do you have a documented security incident response plan?	×			
Cloud Forensics Incident Management		SEF-02.2	thorough incident management, as per established IT service management policies and procedures.	Do you integrate customized tenant requirements into your security incident response plans?		x		
		SEF-02.3		Do you publish a roles and responsibilities document specifying what you vs. your tenants are responsible for during security incidents?		×		
		SEF-02.4		To during security incluents:	x			SaaS Solution
Security Incident Nanagement, E-	SEF-03	SEF-03.1	Workforce personnel and external business relationships shall be informed of their responsibility and, if required,	Are workforce personnel and external business relationships adequately informed of their responsibility, and, if required, consent and/or contractually required to report all information security events in a timely	x			
Discovery, & Cloud Forensics Incident Reporting		SEF-03.2	shall consent and/or contractually agree to report all information security events in a timely manner. Information	manner?	^			
			security events shall be reported through predefined communications channels in a timely manner adhering to applicable legal, statutory, or regulatory compliance	Do you have predefined communication channels for workforce personnel and external business partners to report incidents in a timely manner adhering to applicable legal, statutory, or regulatory compliance obligations?	x			
Security Incident Management, E- Discovery, &	SEF-04	SEF-04.1	Proper forensic procedures, including chain of custody, are required for the presentation of evidence to support potential legal action subject to the relevant jurisdiction	Does your incident response plan comply with industry standards for legally admissible chain-of-custody management processes and controls?	x			
Cloud Forensics Incident Response Legal Preparation		SEF-04.2	after an information security incident. Upon notification, customers and/or other external business partners impacted by a security breach shall be given the	Does your incident response capability include the use of legally admissible forensic data collection and analysis techniques?	x			
		SEF-04.3	opportunity to participate as is legally permissible in the forensic investigation.	Are you capable of supporting litigation holds (freeze of data from a specific point in time) for a specific tenant without freezing other tenant data?	x			
		SEF-04.4		Do you enforce and attest to tenant data separation when producing data in response to legal subpoenas?	x			
Security Incident Management, E- Discovery, &	SEF-05	SEF-05.1	Mechanisms shall be put in place to monitor and quantify the types, volumes, and costs of information security incidents.	Do you monitor and quantify the types, volumes, and impacts on all information security incidents?	x			
Cloud Forensics Incident Response Metrics		SEF-05.2		Will you share statistical information for security incident data with your tenants upon request?	x
